A dummy score is used when there are less than 4 shooters for a team in any week. The dummy will be derived from the lowest handicap score among the opposing teams for that week. A shooter must have a previous average of at least 61 points in order to be included in their team's tally that same week.

A dummy score is used when there are less than 4 shooters for a team in any week. The dummy will be derived from the lowest handicap score among the opposing teams for that week. A shooter must have a previous average of at least 61 points in order to be included in their team's tally that same week.

A dummy score is used when there are less than 4 shooters for a team in any week. The dummy will be derived from the lowest handicap score among the opposing teams for that week. A shooter must have a previous average of at least 61 points in order to be included in their team's tally that same week.
